Welcome to the NSW Government Change Management Community of Practice

The Change Management Community of Practice connects change management professionals across NSW Government to:

- Tackle shared challenges together
- Build knowledge and networks
- Share practical tools and experiences

Who is this community for?

This community is designed for NSW Government employees who work in change management — whether it's your official role or a big part of the work you do. It's open to:

- Practitioners leading or supporting change at a strategic or operational level
- Program or project managers (or similar) who have change management responsibilities

If this is you, sign up to the community

[Join the Change Management ComPrac](#) →

Please note that where change management is only a small or occasional part of your work, this community may not be the right fit – but we'd still love to hear from you about your needs. You can email us at:

change@comprac.nsw.gov.au

What does this community offer?

Joining the Change Management Community gives you access to quarterly events including:

- Workshops: Get hands-on with tools and techniques.
- Case Studies: Hear real-world examples and ask questions.
- Expert Panels: Learn from leaders in the field.
- Group Activities: Collaborate and problem-solve with others.

When you join, you'll also get:

- Access to tools, templates, and resources shared during sessions.
- Recordings and follow-up summaries so you don't miss a thing.
- Opportunities to build a network of peers who "get it" and share your passion for change.

Please note you will need to provide a nsw.gov email address as part of sign up for access to our community platforms.
